

# Cost-effective Quality Inspection Solution

The **eviXscan 3D** scanner (HD Quadro or HD Optima) combined with **Geomagic Control X** software offers a complete professional solution to capture 3D data from an object and to analyze it for quality inspection or dimension measurement.

It can be used in many inspection, design, maintenance and manufacturing tasks, also in an automated process, in various industries like automotive, aerospace, machine construction, energy production, molding, casting and many others.

Offer valid till 30 June 2019

## Heavy Duty Quadro SET

Versatile 3D scanning in harsh environment.

Aluminium body and carbon fiber beam on **Heavy Duty Quadro** guarantees precise measurements in harsh environment.

Two ranges enable to scan objects of different dimensions: from a few centimeters to several meters.

## Heavy Duty Optima SET

High-precision 3D scanning of small and medium size objects.

Heavy body construction enables scanning in variable environment. High point density is helpful for scanning of small, medium and detailed objects.

**eviXscan 3D Suite 2.0** is a comprehensive software platform that delivers the most powerful and user-friendly tools for scanning and mesh processing within straightforward workflow.

Rotary tables ensure the integration with **eviXscan 3D** scanning systems and allows to capture the data from many perspectives.

Positioning system for 3D scanning.

With blue light filters, precise measurements can be taken independently of ambient light conditions (filtering ratio over 95%).

**Geomagic Control X** is a professional metrology software that lets you capture and process the data from 3D scanners and other devices to measure, understand, and communication inspection results to ensure quality everywhere.

## Save 20% comparing to the price of separate products.

Ask your nearest **eviXscan 3D** reseller for details.
