

## Education Package

Learn or enhance your skills in professional design, reverse engineering and/or quality inspection based on 3D scan technology that is the state-of-the-art technology in various industries like automotive, aerospace, machine construction, energy production, molding, casting and many others.

The integrated package composed of the **eviXscan 3D** scanner and the **Geomagic Design X** and **Control X** software tools allows students to comprehend the complete process of 3D data capturing, analysis and reporting in the most important engineering tasks of design, modeling or quality verification.

The offer is valid until the end of 2019

## Heavy Duty Quadro SET

Versatile 3D scanning in harsh environment.

Aluminium body and carbon fiber beam on **Heavy Duty Quadro** guarantees precise measurements in harsh environment.

Two ranges enable to scan objects of different dimensions: from a few centimeters to several meters.

## Heavy Duty Optima SET

High-precision 3D scanning of small and medium size objects.

Heavy body construction enables scanning in variable environment. High point density is helpful for scanning of small, medium and detailed objects.

**eviXscan 3D Suite 2.0** is a comprehensive software platform that delivers the most powerful and user-friendly tools for scanning and mesh processing within straightforward workflow.

Rotary tables ensure the integration with **eviXscan 3D** scanning systems and allows to capture the data from many perspectives.

Positioning system for 3D scanning.

With blue light filters, precise measurements can be taken independently of ambient light conditions (filtering ratio over 95%).

**Geomagic Design X** is an advanced software for reverse engineering. It combines 3D modelling functions like in CAD software with data processing obtained from the scanning process. Based on data from the eviXscan 3D scanner user can create fully parametric and editable models in a format compatible with used CAD software.

**Geomagic Control X** is a professional metrology software that lets you capture and process the data from 3D scanners and other devices to measure, understand, and communication inspection results to ensure quality everywhere.

**Save 20%** comparing to the price of separate products.

Ask your nearest **eviXscan 3D** reseller for details.
